# Company Profile

## of Richter-Helm BioLogics

**Richter-Helm BioLogics offers services for the development and manufacture of biopharmaceutical products from customers in the pharmaceutical and biotechnology industries. Richter-Helm BioLogics produces recombinant proteins, plasmid DNA and vaccines in microbial systems.**

Thanks to our years of experience with protein expression systems, plasmid DNA technologies, downstream processes and cGMP manufacturing, we are in a position to offer our customers and business partners a first-class service from the development through to the production stage.

Our services comprise the establishment of production strains as well as the development of fermentation and downstream processes for manufacturing of recombi-

If you are looking for a competent partner for the production of biopharmaceuticals in microbial systems, **Richter-Helm BioLogics** is the right choice. Putting the decades of experience the company has accumulated in the production of recombinant proteins, plasmid DNA and vaccines at your disposal, it manufactures the products on your behalf in one of its ultra-modern production facilities.

**Richter-Helm BioLogics** provides an all-round service for the customers project: from the development stage,

nant proteins and plasmid DNA. In our state-of-the-art cGMP production facilities we set up cell banks (MCB & WCB) and produce biopharmaceuticals, both for clinical trials and market supplies.

for microbial production in Bovenau

# Company Profile

of Richter-Helm BioTec

**Richter-Helm BioTec and Richter-Helm BioLogics are two closely linked dynamic and expanding biotechnology companies located in Hamburg, Germany. Since 2007, Gedeon Richter Plc., located in Budapest, a leading pharmaceutical firm in Eastern Europe, and Hamburg-based HELM AG, one of the largest independent chemical and pharmaceutical marketing enterprises worldwide, have used their earning power and expertise as a guarantee for the favourable development of Richter-Helm. Richter-Helm BioTec takes care of business development, marketing & sales and product development management on behalf of Richter-Helm BioLogics.**

Should you wish to find out more about our service spectrum, development and production capabilities, we at **Richter-Helm BioTec** are your first port-of-call and competent partner. In close collaboration between you and our experienced specialists, we develop solutions tailored to your particular needs.

Thanks to sustainable, reliable contractual commitments, our customers enjoy the safety standards required for their planning processes. Your

**Richter-Helm BioTec** is responsible for the identification, evaluation and controlling of its own development projects right through to the licensed, finished pharmaceutical product. Therefore, we have an experienced and competent team for in- and out-licensing at our disposal. Due to the continual expansion of our product portfolio we are al-

developments are in good hands when you put your trust in **Richter-Helm BioTec**.

## What we stand for

- Integrated project management
- Reliable production schedules
- Transparent financial agreements

**Richter-Helm BioTec** occupies approximately 100 specialists in interdisciplinary teams in cooperation with **Richter-Helm BioLogics**.

ways seeking for further external development projects. Licensing partners can be international companies as well as national operating sales specialists. New perspectives, which may also serve to minimise financial development risks can be opened up through the formation of development joint ventures. Due to the global presence of the company group, market potentials can be fully exploited.
